ScienceCareerNet Ruhr

Career Forum

Audience

The Career Forum is a module of the ScienceCareerNet Ruhr which addresses post-doctoral students and junior academics who are interested in discussing their career with high-ranking experts and in opening new career paths.

People of all disciplines are welcome to take part in the Career Forum.

What can the Career Forum offer you?

The Career Forum is a one-day event offering post-doctoral students and junior academics the opportunity to learn first hand about career possibilities and conditions in science as well as industry. In a concentrated form, it presents opportunities for individual career planning and the chance of exchanging ideas with experienced persons about higher education policy and career planning on an elevated level. High-ranking experts take time for intensive discussions with you and answer your questions.

The Career Forum consists of a mixture of face-to-face counseling sessions, exciting lectures and small rounds of talks. It is an innovative format with a wide range of topics in addition to various opportunities for information and exchange.

Top priorities of the Career Forum

- Job-description professorship
- Careers in research and development
- Careers abroad
- Academic and non-academic careers
- Questions about starting a company and self-employment
- Strategies of publication
- Research funding
- Internationalization of universities
- Perspectives of science development

The program

Choose between different forum offerings and arrange your individual schedule:

- **Information** in lectures and at information desks with experts
- **Exchange** with high-ranking experts in smaller discussion groups
- **Counseling** in individual talks
